**Re Item V**

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

**Claim 1**

US-A-5 887 396 discloses an assembly according to the preamble of claim 1.

The features of the characterising portion allow adjustment of the length (axially displaceable) of the retention means. This is to provide compensation for different mounting heights.

In US-A-5 887 396 this problem has been solved by allowing one end of the retention means to be bent.

The solution as defined in claim 1 has not been disclosed in any of the documents cited in the search report.
